

The Offshore West Africa Oil & Gas Activity Map

Free Distributions Planned For 2021:

Houston

West Africa as a region is a significant player in oil and gas markets as an energy producer. In 2017, oil output reached 5.5 million bpd, gas 7.1bcfpd, an increase on 2016 fuelled by new gas to power projects.

Due to fall in the oil price, activity within the West Africa region has fallen, but with an upturn in oil prices, exploration and development activity is expected to resume.

This updated map will chart the development status of the region at present, with featured regions of Nigeria, Angola, Ghana, Gabon and Congo, and Cote D'Ivoire.

Covering the Operational and Future Fields, Floating Production Systems, Subsea and Fixed Platforms installations, installed pipelines and future projects, and operational and future LNG projects, this map will bring feature activity to date and going forward.

This new map will be a continuation of a series of fresh, topical and informative, user-friendly wall maps, again aimed at the decision makers within: project instigators – including NOC's and Operators, the offshore supply chain, investors and financiers and further associated industries, informing the status of offshore oil, gas and marine related projects and future activity.

As in the past, all maps published will be launched at related major industry events, ensuring direct distribution to a targeted audience.

History, and experience, has proven – freely distributed project reference material is eagerly sought after and received.

To target your company at these decision makers and optimise response from this focused audience, please give serious consideration to advertise within our products.

We hope this new map is of serious interest for inclusion within your companies 2020 media plan.

Here are the details:

Publication Date – November 2020

Regional Coverage:

As shown on the map layout below.

Topical Coverage:

- Operational Offshore Oil and Gas and Condensate Fields
- Operational Offshore Oil and Gas Fixed and Floating Installations
- Subsea Installations
- Offshore Discoveries
- Offshore Licence Blocks – Operated and Non-operated
- Operational and Future Pipelines

Geographical Coverage;

Countries and Median Lines - Offshore Bathymetry - Major Cities, Towns and Ports

Distribution:

- Free distribution at major events globally
- All advertisers to receive free voucher copies based on size and position booked.

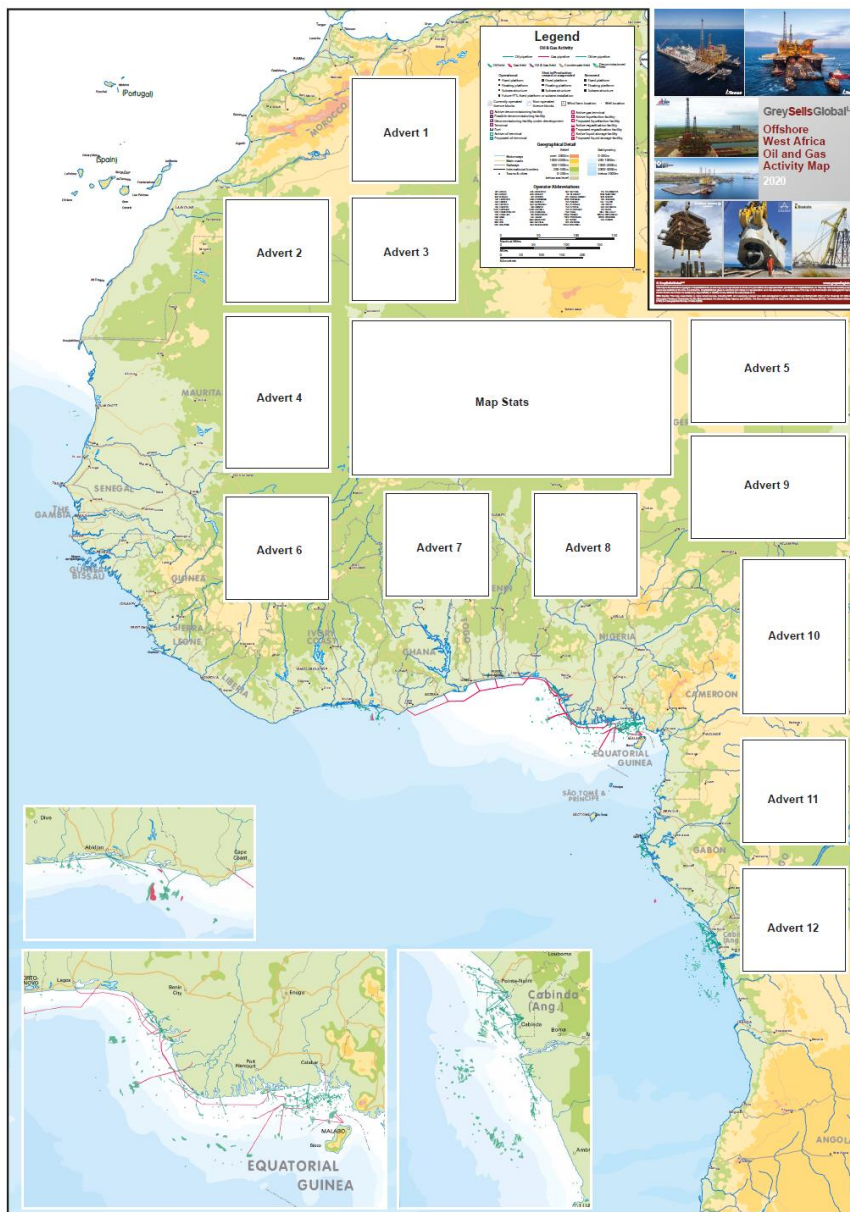

Advert Copy Deadline:

End of October 2020

Advertising will be available on all the above maps, charged at the following rates:

Square	100mm x 100mm image area	Space cost	GB£1,750.00	Cost inclusive of 25 printed maps for your company distribution
Standard	100mm x 150mm image area	Space cost	GB£2,500.00	Cost inclusive of 50 printed maps for your company distribution
Enhanced	100mm x 200mm image area	Space cost	GB£3,250.00	Cost inclusive of 100 printed maps for your company distribution
Superior	150mm x 200mm image area	Space cost	GB£4,750.00	Cost inclusive of 150 printed maps for your company distribution
