

With 33+ year's experience in the publication and release of concise offshore oil and gas activity maps, many of which have now become industry standard reference sources, it is possible to go further with the base maps images to supply **Personalised Maps, Year Planners and Atlases.**

Each of the base maps currently shown in our as-published series can be stripped down to the base map image, removing the main title piece and the adverts etc, and can then incorporate client specific logo(s), images and technical data like office locations and project references.

The base maps can be as shown within our web site with full coverage, or the map areas 'cropped' to show just a specific region, e.g. UK. Two regional maps can also be joined together. E.g. The North Sea and Mediterranean.

If the region you are looking to cover by the map is not shown, GSGL can originate new maps from scratch, we hold a good deal of regional data as-yet unpublished, e.g. West Africa.

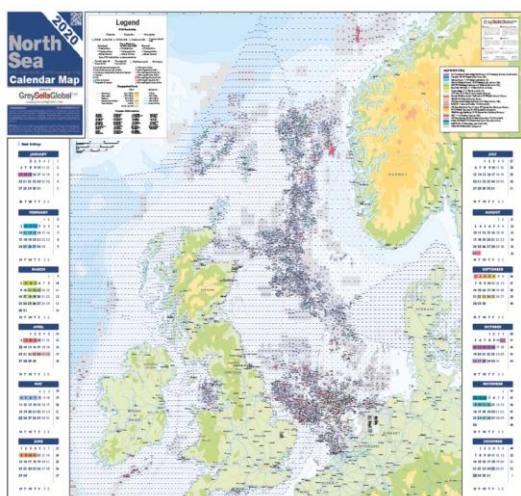

GreySellsGlobal would be pleased to undertake the full design, origination and production, through to delivery, to your office as a set price quotation.

To undertake and submit a quote, a full and informed content brief would need to be discussed. Please contact us direct for a discussion call.

Print runs can be from single copies (printed in-house), small print runs, through to the 1000's print runs (conventional printing)

Also possible:

- Wallcharts and Calendar Maps
- Notebooks and Diaries, with the maps as a feature Atlas

---

History, and experience, has proven – freely distributed, up to date offshore project reference material distributed at exhibitions and conferences is eagerly sought after, and gratefully received.

## Typical Coverage

**Regional Coverage** – As existing published maps or as requested

**Client Specific Requirements –**

- Main Title Piece
- Images and Logo's
- Project Reference List
- Office Locations of Specific Projects Locations
- Diaries and Notebooks – can include gold blocked covers and insert tip-in pages

**Topical Maps Coverage -**

- Offshore Oil and Gas and Condensate Fields
- Offshore Oil and Gas Fixed and Floating Platforms
- Offshore Subsea Tieback and in-field Major Subsea Structures
- Renewables Licence Areas (Static and Floating Wind Farms)
- Major Pipelines, Trunklines and Interconnectors
- Well Locations
- Offshore Licence Blocks – Operated and Non-operated - quadrants with quadrant name and number
- Future Projects & Activity
- Oil and Gas Terminals
- Decommissioning Yards - with Decommissioning/Disposal/Liquid Storage – With active licence / under development / possible status

**Geographical Coverage;**

- Countries and Median Lines
- Offshore Bathymetry
- Major Cities, Towns and Ports

To receive our best prices, in a formal quotation, please contact us with your outline scope of the project with details for layout, quantity and delivery. We look forward to hearing from you.
