

## Map Media

With over 32+ year experience in the publication and release of concise offshore oil and gas activity maps, many of which have now become industry standard reference sources, it is with great pleasure to present the release of the following offshore oil and gas activity and concession maps.

These new maps will be published as a series, of fresh, topical and informative, user-friendly wall maps, again aimed at the decision makers within: project instigators, the offshore supply chain, investors and financiers and further associated industries, informing the status of offshore oil, gas and marine related projects and future activity.

As in the past, all maps published will be launched at related major industry events, ensuring direct distribution to a targeted audience.

History, and experience, has proven – freely distributed project reference material is eagerly sought after and received.

To target your company at these decision makers and optimise response from this focused audience, please give serious consideration to advertise within our products.

We hope the new maps will be given serious consideration for inclusion within your companies 2018 media plan.

Here are the details:
