With over 33+ years experience in the publication and release of concise offshore oil and gas activity maps, many of which have now become industry standard reference sources, it is with great pleasure to present the release of the following offshore oil and gas activity and concession maps between now and the end of 2021.

The maps are published as part of a continuous series of fresh, topical, informative and user-friendly wall maps, again aimed at the decision makers within: oil companies and operators, the offshore supply chain, OEM and SME companies and investors and financiers and further associated industries covering Renewables and Decommissioning, informing the status of offshore oil, gas and marine related projects and future activity.

As in the past, all GSGL maps published will be launched at related major industry events, ensuring direct distribution to a targeted audience.

Planned GSGL events (so far) for 2021 are:

- **February** - Offshore Mediterranean & Black Sea Map
  Expected Launch – OMC, Ravenna

- **May** - Offshore West Africa Oil & Gas Activity Map
  Expected Launch – OTC, Houston

- **August** – The Concise North Sea Map
  Expected Launch – Offshore Europe, Aberdeen

- **October** – The Northwest Europe Offshore Decommissioning Activity Map
  Expected Launch – Offshore Decom Conference, St Andrews, Scotland

History, and experience, has proven – freely distributed, up to date offshore project reference material is eagerly sought after, and gratefully received.

To target your company at these decision makers and optimise response from this focused audience, please give serious consideration to advertise within our products.

We hope the new maps will be given serious consideration for inclusion within your companies 2020 media plan.

**Maps Planned For 2021 Release**
Typical Coverage

Regional Coverage – As indicated in map title

Topical Coverage:
- Offshore Oil and Gas and Condensate Fields
