

## The Magazine of Choice for Marine & Underwater Robotics Professionals

[www.rovplanet.com](http://www.rovplanet.com)

The “*ROV Planet*” Magazine has long been enthusiastic to create their first ever **ROV/AUV Planet Poster** featuring some of the technologies and equipment used to perform both the exciting and the routine offshore marine robotic related work that industry professionals perform every day.

The launch of this first poster, in what will become a series of topical images, will cover the **Offshore Energy Sector** featuring; Oil and Gas Field Development, Subsea Production, Floating Wind Energy and Floating Production Systems with many of the supportive infrastructure technologies for Underwater Survey, Installation and Lift, Power and Transportation Lines, Marine Construction and Support Services.

Unique for project planning and training, and now more recently for webinar visuals and presentations to visibly feature equipment, roles and tasks, this poster will highlight a selection of the essential equipment being used and some of the essential support vessels required.

There will be a print run of 2500 copies, 1500 distributed via the “*ROV Planet*” Magazine and to the poster advertisers, plus+ there will be additional copies for clients, by request, and available for sale as rolled and laminated versions for clients wishing to frame & mount them.

Within the poster, limited advertising positions will be available. Please see the following draft layout (currently work in progress).

This unique poster will be an excellent medium from which to promote your companies’ services, facilities and equipment to the global underwater marketplace.

To advertise your company within this poster, GreySellsGlobal Ltd have undertaken the sales role to sell the available advertisement positions. Please review the following layout and decide which advertisement fits your requirement and budget, fill in the **Booking Form** below then scan and return it back to us at:- [poster@rovplanet.com](mailto:poster@rovplanet.com) and we will be in touch.

Three advertisement sizes are available and special sized adverts can be discussed subject to details:-

**Flagship Position** – **Lower Central Poster** @10cm h x 40cm w at £4500 including 50 posters

**Prime Positions** – **Shown A to D** @10cm x 14cm at £2500 including 30 posters

**Standard Positions** – **Shown 1 -13** @ 10cm x 7cm\* at £1500 including 20 posters

*\*Multiple positions sold as one single, larger space are also possible.*

Please do not hesitate to let us know which display position you require, so we can reserve it for you, interest in this poster is expected to be very high.

---

Copy deadline for finished display materials is 18<sup>th</sup> February 2021

Layout Guide (for advert position purposes only)

Topical coverage to include:

- Subsea Production • Floating Wind • Offshore Infrastructure with Fixed and Floating Platforms; Marine Construction – including • Underwater Inspection • Excavation and Trenching • Underwater Survey
- Subsea Positioning • Pipelines, Power Lines and Control Lines • ROV and AUV Vehicles and Operations • Navigation and Positioning

YES. Please book advertisement number \_\_\_\_\_ for us at GB£ \_\_\_\_\_

Name \_\_\_\_\_ Comment or special request \_\_\_\_\_

Position \_\_\_\_\_

Company \_\_\_\_\_

Tel \_\_\_\_\_

Email \_\_\_\_\_

Signature \_\_\_\_\_

P.O. number (if required) \_\_\_\_\_

Upon receipt of your above booking instructions, a formal booking acknowledgement will be sent.
