

## Announcing the launch of a new company and a new Northwest Europe Offshore Decommissioning Projects Map

New company, familiar face.....

With over 30+ years' experience in the publication and release of concise offshore oil and gas activity maps, many of which have now become industry standard reference sources, Steve Adams (formally with Infield-Wood Mackenzie) is pleased to announce the start up of -

**GreySellsGlobal<sup>Ltd</sup>**

This new company will continue the tradition of publishing high quality, user friendly, industry reference wall maps, with a fresh, topical and informative style. Again, the maps will be aimed at the decision makers and project instigators, the offshore supply chain, investors and financiers and further associated industries, informing the status of offshore oil, gas and marine related projects and future activity.

As in the past, all maps published will be launched at related major industry events, ensuring direct distribution to a targeted audience.

History, and experience, has proven – freely distributed project reference material is eagerly sought after and well received.

To target your company at these decision makers and optimise on this uptake, from this focused audience, companies will again be able to advertise their products, services and facilities.

GreySellsGlobal are confident the new maps will be equally successful and sought after.

The first, of four initial maps, will be published in April 2018 and will detail the Northwest European Offshore Late-life Fields and Decommissioning Projects (and associated yards locations).
