

Announcing the launch of a new company and a new NW Europe Offshore Decommissioning Projects Map

With over 30+ year experience in the publication and release of concise offshore oil and gas activity maps, many of which have now become industry standard reference sources, it is with great pleasure to announce the release of this, the first map under my new company:

GreySellsGlobal^{Ltd}

This new map will be the first of a series, of fresh, topical and informative, user-friendly wall maps, again aimed at the decision makers within: project instigators, the offshore supply chain, investors and financiers and further associated industries, informing the status of offshore oil, gas and marine related projects and future activity.

As in the past, all maps published (3000 copies) will be launched at related major industry events, ensuring direct distribution to a targeted audience.

History, and experience, has proven – freely distributed project reference material is eagerly sought after and received.

To target your company at these decision makers and optimise response from this focused audience, please give serious consideration to advertise within our products.

We hope this new map is of serious interest for inclusion within your companies 2018 media plan. Here are the details:

The Northwest Europe Offshore Decommissioning Projects Map Release Date – April 2018
