

New Company, Familiar Face, Proven Success, launches its first Offshore Decommissioning Map at TotalDecom18

GreySellsGlobal Ltd (GSGL), a newly launched company based in Aberdeenshire is pleased to announce the release of its first Decommissioning Activity Map at the industry leading event - TotalDecom18.

Industry stalwart, Steve Adams, has over 30 years-experience within the offshore publications market supporting the offshore oil, gas and marine sector. His career has focused on the research, publication and circulation of concise offshore oil and gas activity maps, reports and directories and databases, many of which have now become industry standard reference sources.

Steve Adams' 32-year experience to date includes his early years with Oilfield Publications Ltd (OPL), now part of Clarksons Research Services, for whom he also worked, and moved to Infield Systems, who are now part of Wood Mackenzie.

In wishing to return to his publishing 'roots' Spring 2018 saw Steve Adams establish GreySellsGlobal Ltd. The company, whilst based in Aberdeenshire, plans to publish a range of activity maps to support the global offshore sector. Steve Adams said: "I have been absolutely delighted with the positive support and response from the offshore energy sector that I have received these last few months, as I set up my new venture GreySellsGlobal."

"For the past months I have been preparing and developing our new Northwest Europe Offshore Decommissioning Activity Map, ready for its launch at TotalDecom18, everyone I have met has been very supportive and I am looking forward to attending this key event to showcase this new Activity Map. By applying my in-depth industry knowledge and experience, I am continuing to publish high quality reference maps used and appreciated so much within the offshore sector."

The NEW Northwest Europe Offshore Decommissioning Activity Map will be available at the TotalDecom18, 23-25 April 2018 - Manchester Central.

The new NW Europe Offshore Decommissioning Activity Map covers the UK, Ireland, Norway, Denmark, Holland, Germany, Belgium & France and provides detailed information which include; completed decommissioning activity, on-going decommissioning activity, planned decommissioning activity, late-life producing and pre-decommissioning activity, future decommissioning offshore activity and onshore yards offering decommissioning/disposal/liquid storage that have either an active licence or currently under development.

The new map will be the first in a series of informative maps that illustrate and track offshore oil, gas and marine related projects and planned future activity. The NW Europe Offshore Decommissioning Activity Map will be available at TotalDecom18 from the GSGL stand.

END
