

Press Release – 14-07-2021

2021 edition Offshore Mediterranean & Black Sea Oil & Gas Activity Map set for OMC event launch

The global energy market is undergoing massive change. The focus on oil and gas projects is being challenged with the need to reduce carbon emissions and the arrival of renewable energy sources.

The Mediterranean and the Black Sea have seen offshore oil and gas exploration and development activity leap, including major gas discoveries in the Black Sea.

As map media partners at the OMC, GreySellsGlobal have been carefully tracking the complete Med & Black Sea regions offshore activity and developments to feature within their new Offshore Mediterranean & Black Sea Oil and Gas Activity Map. This new fully updated activity map will feature all the latest projects and much more.

Featuring:

- Production exploration and development in Cyprus, Israel and Egypt
- Major new discoveries in Turkey Black Sea
- Latest licences and blocks awards and on offer
- Energy transition projects including CCUS (Greece) and Renewables

This new map is planned for FREE distribution at the Offshore Mediterranean Conference, Ravenna and the Eastern Mediterranean Conference, Cyprus – the map will also be available for FREE download from the GreySellsGlobal website at the start of the OMC event.

Full details on this new map can be found within the **Media/Upcoming Maps** section of our web site – **www.greysellsglobal.com**

About GreySellsGlobal Ltd
